

## About the concept

Excapper.com is a tool that tracks bets and money on the betting exchange according to your parameters. Therefore, the parameters for notifications that will appear on the site or post to the telegram channel must be set in the settings.

1. To configure parameters and notifications, you must be registered on the site.
2. After that, go to the settings section

<https://www.excapper.com/index.php?action=settings>

## General

The screenshot shows the 'General' settings tab in the Excapper application. At the top, there are four tabs: 'General' (highlighted), 'Favorite', 'Sharp Bets', and 'System settings'. The main content area contains three sections: 'Country:' with a list of country codes (al, am, ar, ba, bd, bi, bo, br, bt, by, ~i), 'Leagues:' with an empty list, and 'Hide Leagues:' with a list of leagues (Super League, Polish Ekstraklasa, Premier League). A yellow 'Save' button is located at the bottom of the settings area.

These are optional settings. They hide the leagues / countries you don't need

**Country** - List of countries in abbreviated order that you want to add for tracking.

<https://www.excapper.com/cc.pdf>

**Leagues** – List of leagues that you want to add for tracking.

**Hide Leagues** - The list of leagues that you want to hide (for example, Premier League, La Liga, then the search for them will not be performed).

## Favorite

On this page, you set the search parameters for games by% of bets in the markets, by the amount of bets, etc.
